

Miracles In Sight

INSPIRATION. COLLABORATION. INNOVATION.

April 2023 | VOLUME 2 | ISSUE 1

Miracle Minute

INSIDE THIS EDITION

Miracles In Sight works with local and international communities to educate about the need for eye and tissue donors.

Did you know?

Miracles In Sight has provided nearly 400 corneas internationally!

Spaghetti Dinner Benefits Miracles In Sight:

Justice Sheaffer, a Senior at Mifflin County High School, was able to raise \$2,500 by organizing a spaghetti dinner fundraiser to bring awareness for Miracles In Sight. Honoring her late uncle who donated his corneas in 2004, Sheaffer wanted to dedicate her senior project to something personally impactful. Thank you, Justice, for your dedication to “Creating Miracles with Each Bite” and for your commitment to raising awareness for cornea donation! If you would like to read the full article, please follow the link: <https://loom.ly/HA09Hgc>

If you would like to honor a recipient or donor family, please email us at:

businessdevelopment@miraclesinsight.org

COMING SOON:

Miracles In Sight will have recipient packets available soon. Our packets will help educate recipients on eye donation. Reach out to your local liaison for more information.

Miracles In Sight provides an eye anatomy course for a clinic staff in Texas

Miracles In Sight's team work together to conduct workshops for clinic and ASC personnel. The workshops can include eye anatomy training, surgical skills, or providing education on eye bank tissue preparation.

Miracles In Sight Helps to Restore Sight Globally

Since the start of the new year, we have provided just under 400 corneas to global communities in need of corneal tissue. We work with ophthalmologists from all over the globe; ranging from Central America to the Middle East; from Western Europe to the conflict in Ukraine; and including our newest outreach, Ghana.

New Service Lines Now Available!

Opticyte™
Regenerative Ocular Care

Opticyte Amniotic Ocular Matrix is used to treat mild to severe ocular surface disease and other corneal defects.

 **Vital Tears™**

Autologous serum eye drops (ASEDs), autologous serum tears (ASTs), or just serum tears are customized drops made from a patient's own blood to treat those suffering from ocular surface conditions.

Amphotericin B

At surgeon request, we will supplement storage media with amphotericin B, a widely used antifungal in ophthalmology, in a concentration that has shown to be safe and effective in in vitro studies.

Miracles In Sight Attends YoungMD Connect Event in Austin, Texas

A highlight from our team was the excitement medical students and residents showed about seeing donor corneal tissue! Most had never seen donor tissue before. We had the opportunity to explain how we obtain the corneal tissue and why that's important to us and them as future physicians. Miracles In Sight had an amazing time participating! To see more photos, [follow us on Instagram!](#)
